Summary

Software Engineer in institutional digital-asset fintech. I own the frontend end to end, from architecture and UX decisions through to production delivery, with contributions across backend, AWS and CI/CD.

Education

Bachelor's Degree in Systems · Instituto Belgrano Rosario, Argentina
2013-2016

Experience

- Software Engineer · Membranelabs

New York, USA
Oct 2024 - Present

 - Own the frontend of the Loans and Collateral domains, defining the microfrontend architecture (NX, React, Material UI) and the UX decisions.
 - Ship complete features to production: frontend, backend endpoints over PostgreSQL, progressive rollouts with feature flags (LaunchDarkly) and tag-based CI/CD on AWS.
- Frontend Developer · Geopagos

Buenos Aires, Argentina
Jan 2024 - Oct 2024

 - Frontend technical referent: set architecture guidelines and reviewed the team's code.
 - Built internal tools to generate client use cases and speed up support, on Module Federation, Next.js and TypeScript.
- Fullstack Developer · Qualita

Buenos Aires, Argentina
Apr 2022 - Mar 2024

 - Delivered complete client products with Next.js and TypeScript, including Vluvex (an overseas warehouse-style shopping platform) and e-commerce stores.
 - Shipped web products to desktop and mobile from a single codebase with Electron and Capacitor, integrating APIs via GraphQL and Directus.
- Frontend Developer · Nosis

Buenos Aires, Argentina
Nov 2022 - Dec 2023

 - Built the company's internal CRM from scratch to production and led the frontend of the e-commerce V2.
 - Drove the codebase migration to TypeScript and the refactor of several modules, across a heterogeneous stack (React, Next.js, Svelte, Vue, Astro).
- Frontend Developer · Dos al Cubo

Buenos Aires, Argentina
Dec 2021 - Nov 2022

Onboarded new clients onto the Thinkindot CMS for digital media (newspapers, radio and TV), with production support, markup and backend work in PHP.
- Fullstack Developer · Providencial Consulting

Rosario, Argentina
Apr 2016 - Aug 2019

Developed new features and supported production systems in .NET and PHP, on projects across agriculture, e-commerce and CRMs.
